## MEDICO-LEGAL EXPERIENCE

I have been involved in medico legal work since 1992, earliest as a senior registrar in the Emergency departments of Glasgow. During this time, I also attended the city sheriff, magistrate and high court as a crown professional witness.

The bulk of the medico legal work started since my consultant appointment at Wrexham in 1996. I have worked in this busy DGH catering for 70,000 patients annually. I moved to Guernsey as a senior consultant in 2015. I have already established my contacts with the local solicitor network and enjoy a good relationship. I receive regular instructions from the national medico-legal agencies, Welsh Risk Pool, UK solicitors and the GMC for clinical & professional negligence reports. This includes mediation, joint expert meetings and court appearances.

**The current proportion of my medico-legal reports is 60% claimant: 30% joint: 10% defendant related.**

My professional training consists mainly of *General Surgical* specialities, Orthopaedics and Accident & Emergency (since 1992). I have kept up to date with recent trends of medicolegal practice and crown reforms. I am [CPR section 35](#) accredited with relevant certification on my report logo. I believe that accreditation, promptitude, precision and objectivity of my structured reports have ensured instructions and references.

Solicitor's references are available on request.
