Health Technology Systems, Inc.
Healthcare Regulatory Specialists

GarryWalsh@HospitalPolicyNet.com

Biography

Our president Garry M. Walsh has been a healthcare professional for 35 consecutive years. He became a patient care and healthcare safety advocate while devoting hands-on care and management oversight to Oncology patients for almost a decade. He planned the delivery of safe and effective patient care as a physicist's assistant and medical dosimetrist, directly serving and reporting to the medical staff. He also guided the provision of exemplary patient care while serving in the role of administrative director of several multi-disciplinary cancer centers – during which time he learned the complexities and importance of integrating excellent medical, technical and nursing care.

In 1988, Garry incorporated his first healthcare regulatory compliance assessment training firm, Health Technology Systems, Inc. (HTSI) in the State of Florida. Garry and his team of professional nurses and healthcare engineers have traveled 1.6 million miles visiting 44 states in our nation to collaborate with, educate, guide and protect 1000's of healthcare leaders and hospital staff -- from the board room down to the boiler room -- in all matters relating to regulatory accreditation and compliance. HTSI has consistently delivered CMS and Joint Commission preparation and rescue services throughout the full spectrum of healthcare settings, including acute care, behavioral health, skilled nursing and rehabilitation, as well as ambulatory care environments. HTSI specializing in helping multi-facility health systems develop and implement unified and integrated compliance structures and systems throughout their hospital, ambulatory and provider-based practices to achieve system-wide operational efficiencies.

In 2002, Garry incorporated Hospital Policy Net, Inc. (HPNI), an e-Commerce firm, which is also registered in the State of Florida. All solution documents were developed based on successful strategies that have helped our healthcare clients successfully pass CMS and Joint Commission surveys by demonstrating compliant, safe and effective inter-disciplinary care.

Solution document collections are available for Management of the Environment of Care, Life and Facility Safety, Patient Safety, Emergency Management, Improving Organizational Performance, Management of Information, Human Resources, and Nursing. To learn more, visit www.HospitalPolicyNet.com and review HPNI's comprehensive array of CMS and Joint Commission compliance solution document collections.

In 2003, Garry began delivering healthcare expert witness services on healthcare policy, procedure and regulatory matters. He provides comprehensive case-related analysis of patient care and safety activities that may be associated with healthcare errors or injuries and when appropriate, renders formal case opinions during depositions and court appearances.

For past 25 years, HTSI and HPNI were selected as the consultative and regulatory compliance document vendor of choice for hundreds of healthcare institutions and health systems throughout the nation. HTSI is the only healthcare regulatory and accreditation improvement firm that brings 1000+ proven documents onsite during all consultation projects to help our client hospitals achieve immediate, on-the-spot compliance gains.

Healthcare Clients Served

Through the resources of either HTSI or HPNI, we have helped prepare the hundreds of hospitals and health systems achieve compliance with either CMS regulations or Joint Commission accreditation requirements. Many are nationally renowned facilities, such as:

UCLA Health System, Cleveland Clinic, Princeton Healthcare System, Mayo Clinic, numerous VA and Military Hospitals, Kaiser Permanente, Los Angeles-USC Medical Center, Dan Farber Cancer Institute, Bon Secours Health System, scores of hospitals owned / managed by HCA and Tenet Healthcare as well as Children's Hospital Boston, the primary pediatric teaching hospital of Harvard Medical School.

Our international healthcare clients include hospitals in Oman, Saudi Arabia, Hong Kong, Bangalore India, and Beijing China.
